

CLIENT ALERT

"Look Out Below!" -- Regulating the Domestic Use of Unmanned Aerial Systems

Sep.28.2012

On September 14, 2012, GAO released a [report](#) on unmanned aircraft systems (UAS) underscoring increased government scrutiny of the pros and cons of domestic use of UAS by federal, state, and local agencies in the wake of the FAA Modernization and Reform Act of 2012, which took the first steps towards integrating UAS into U.S. airspace. On October 10, Crowell & Moring will co-host a free [webinar](#) focusing on several of the central concerns that loom large for operators, manufacturers, regulators, and other interested parties seeking to introduce unmanned systems into the civilian market as this new regulatory environment emerges.

For more information, please contact the professional(s) listed below, or your regular Crowell & Moring contact.
