

Corporate

We use our legal know-how and deal experience to analyze your challenges and opportunities in pragmatic, real-world terms—just as you do. Being nimble advisers means anticipating issues and developing innovative, efficient solutions and alternatives.

We offer a full-service corporate practice covering complex corporate and securities, M&A transactional, governance, and compliance matters. We work with large international and domestic public companies, mid-sized and emerging businesses, privately held firms, private equity sponsors and hedge funds, investment firms, and high net-worth individuals across a wide range of industries.

Business today is truly international. With corporate attorneys in five US and two international offices, we provide seamless national and cross-border experience.

A multidisciplinary approach means we handle a broad range of matters, including providing regulatory guidance and, when necessary, avoiding and resolving disputes. Our lawyers have deep industry knowledge, and we know the agencies that regulate industry. In fact, over 100 of our lawyers have come from these agencies. From the world's most admired companies to start-ups, we help our clients attain their financial and business goals.

Experienced and nimble. It's no wonder the *Financial Times* recently ranked us as one of the top 25 most innovative firms. And, *Chambers USA* and *Law360* consistently praise the quality of our counsel and skills of our team.
