Payers, Providers, and Patients – Oh My!: Crowell Health Solutions Mini-Series Part 1 - The Intersection of Technology and Value-Based Care

April 25, 2022

This episode is the first part in a miniseries with **Crowell Health Solutions**, which is a strategic consulting firm that Crowell & Moring launched earlier this year to help healthcare organizations and technology companies transform health care by improving patient care and health outcomes, advancing health equity, and lowering health care costs through solutions like digital health innovations and value-based healthcare models.

In this episode, Troy Barsky interviews Michael Meng (the CEO of Stellar Health) about how technology has impacted, and continues to impact, health care delivery in light of regulatory changes focused on advancing value-based care. Michael Meng is the CEO and co-founder of Stellar Health, which is a healthcare technology company focused on enabling success across the value-based care continuum by bridging the incentive gap between providers and payors.

Payers, Providers, and Patients – Oh My! is Crowell & Moring’s health care podcast, discussing legal and regulatory issues that affect health care entities’ in-house counsel, executives, and investors.
