The Association is pleased to announce a four-part webcast series with intense focus on appellate advocacy. Effective and efficient advocacy lies at the heart of the success of the justice system and the skill set of each member of our profession. These programs will examine, respectively, choice of theory, selection of facts, support for positions and citations practice, and preparation for oral argument. Nationally prominent panelists from both Bench and Bar will shepherd us through the topics, guiding us with their extensive experience and insights through the appellate perspective and the role of the appellate advocate.
