

**An Introduction to  
the American  
Recovery and  
Reinvestment Act of  
2009:  
Implications for  
Construction  
Contractors**

# State And Local Incorporation Of Federal Requirements

---

- State and local projects funded by ARRA are subject to all federal requirements, just like all federally-funded projects that state and local agencies are used to
  - This will lead to the usual conflicts, *e.g.*, conflict between CA and federal DBE requirements
- New requirements specific to ARRA will be new to state/local officials, with expected inefficiencies

# State And Local Approach To New ARRA Requirements

---

- Many states issuing guidance, *e.g.*:
  - CO DOT has issued standard specs to be added to all ARRA projects
  - NJ has issued guidance on reporting requirements and methods
  - CA Office of Legal Services memo re incorporation of ARRA requirements is overdue (indicating potential conflicts identified but not resolved)
  - TX indicates it may introduce additional reporting requirements (yet to be identified)
  - FL has issued a checklist for local agencies to follow in contracting

# Enhanced Oversight Of State And Local Economic Recovery Act

---

- Bill introduced in the House to improve state and local oversight of ARRA projects
- Would modify ARRA, allowing state and local governments to use stimulus funds for auditing, contract/grant planning and management, investigations of waste/fraud, and data collection
- Also would permit state and local governments to use GSA supply schedules

# Practical Challenges And Uncertainties At State And Local Level

---

- Many state and local agencies have seen recent staffing cuts
- At the same time, ARRA is driving a dramatic increase in work
- One source stated “They’ve cut my staff and quadrupled my work!”
- Early projects – likely to have been backlogged due to funding restrictions
- Second wave of projects – likely to have been rushed through planning and design

# Practical Challenges And Uncertainties At State And Local Level (cont'd)

---

- Compressed planning/design phase will increase need for project administration
- Meanwhile, staff cutbacks may mean less project administration in any event
- Dramatic increase in overruns and claims may result
- Change order authority is limited under ARRA
- ARRA funding is generally limited to original project estimates (*i.e.*, no or limited ARRA funding set aside for change orders and claims)
- Resolution of claims/overruns will be challenging
